Note:

\*) For the calculation of the equivalence totals, the respective acid forms (CBDA, CBGA&THCA) were multiplied by the factor 0.877 or 0.878 in order to deduce the equivalent amount of the neutral form. ND=not detected

Analysis method: HPLC-DAD (High Performance Liquid Chromatography - Diode Array Detector). All measurement methods were calibrated and checked with certified reference materials (CRM). Mass% of – is to be concluded as "not detected" = <LOD "Limit of Detection" This Certificate shall not be reproduced except in full, without the written approval of Hanfama Pflanzen Produktions GmbH
